DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 53, 54, 57, 59, 60 and 63 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mitchell et al..
- 3. Mitchell et al discloses a method and apparatus for positioning a motor as claimed where: "a positioning unit" is retrieved by 10 from 20; a frequency is selected by 18; pulse width is determined as described in the specification (col. 5, II. 34-46); and positioning input corresponds to a period of time (see col. 5, II. 3-15, for example). The motor controller of Mitchell et al. inherently calibrates the motor, since it operates to maximize accuracy of the motor.

Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 5. Claims 1-52 are allowed.

Claims 55, 56, 58, 61, 62 and 64 are objected to as being dependent upon a 6. rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
